Janu ry hath xxxi dayes.

Now *Boreas* bold breaks from his hollow caves,
The Brooks and Rivers deck'd with silver waves ;
The bald-pate woods are periwig'd with wool,
That Nature (now) from hide-bound clouds doth pull.

February hath xxviii. daies

Yet, yet fierce blustering *Æolus* doth storm
At Natures Darling which is newly borne;
The tender bud is curb'd by the Frosts ire,
So cold it is, the pot may freeze by th'fire.

March hath xxi dayes.

The Lamp of Heaven ushers in the Spring,
And Birds harmoniously its Welcom sing;
Each Thing revives upon the Land and Seas,
And sick men (now) are sensible of ease.

April hath xxx. days.

The Herbs and plants sprout forth their fragrant buds
And clothe in green the fertile fields and woods;
Flora presents varieties of flowers
While light robs Mortals of some pensive hours.

May hath xxxi days.

Let healthful perions in this month of May,
Walke early in the fields that are soe gay;
Good house-wives now, their stills at worke should set
With herbs and plants, they in the fields doe get.

Having found your sum of Money in the side Column, under the Month in the common Area, is the true use or interest belonging thereunto.

A Prognostication,

Physical Observations.

Sanguine persons may Bleed when the Moon is in *Pisces*.

Cholerick persons, when she is in *Cancer* or *Pisces*.

Elegmatick persons, whiles she is in *Sagittarius* or *Aquarius*.

Melancholly persons, at that time as she is found either in *Libra*, *Aquarius*, *Pisces*.

Purge with Electuaries the Moon being in *Cancer*, with Pills she being in *Pisces*; With Potions she being in *Virgo*.

Vomit, the Moon being in *Taurus*, *Virgo*, or *Sagittarius*; take Clusters she being in *Aries*, *Cancer*, or *Virgo*; stop Fluxes and Rhumes she being in *Taurus*, *Virgo*, or *Capricorn*; Bath, when she is in *Cancer*, *Libra*, *Aquarius*, *Pisces*. Cut the hair of the head or Beard, when *Luna* is in *Libra*, *Sagittarius*, *Aquarius*, *Pisces*; and at the same time encreasing, that is, between her wane and full. And thus much for Astrologo-physical observations.

Of the four Quarters of the Year,

Of the Spring.

Equinoctial, Vernal, or the Spring season, beginneth always when the lamp of Heaven entereth the Coelestial Ram, and this year happens on *March* the 10th, at one of the clock after noon, and it remaineth all the time that the Sun is passing through the three Vernal signs, *Aries*, *Taurus*, *Gemini*. This season resembleth growing Youth, for that all things now flourish and are vernaculous, fresh and green, delighting the senses of all creatures, and according to the Poet,

Now Zephyrus begins to buss his Flora,

Swift winged fingers to salute Aurora;

*And Gentle Cupid, through the universe, (pierces
with pleasing wounds each creatures heart gins*

I shall not stand to give you many large Astrological
judgements

Trig, 1659.

judgements of the year from the Cœlestial figure of this season; because there are divers have undertaken that task, and I should (if not anticipate, yet) be found to burthen the World with unnecessaries. I will therefore (I say) forbear all things of that nature, and present you with the Descriptions of the rest of the Quarters.

Of Summer.

Solstitium Æstivum, or the Summer season, commences when this Globe of Earth hath divid'd her self to the furthest limit of her Southern inclination; or (if you will nor away with *Copernicus's* opinion) when *Sol* hath made his farthest progress North ward, making longest days and shortest nights to us that live on this side the Equator, which (either way considered) happens this year on June the 11th. at 5. a clock in the afternoon, and it continues until the Sun hath passed through *Cancer*, *Leo*, and *Virgo*: This season represents vigorous age, and is hot of constitution like unto it.

The Earth cracks with Heat, and Summer crowns his
with gilded ears, as yellow as her hairs; (caves
The Reaper panting both for heat and pain,
with crooked razor shaves the rusted plain.

Of Autumn.

Equinoctium Autumnale, or the Autumnal quarter begins on September the 13. at 4. of the clock in the Morning; at which time the Earths Axis being parallel to the Sun, doth move again in its diurnal revolution directly to the suns superficies; or the Sun (if men will have it so) crossing the Worlds Axis, which a right Angle doth make equal course in every Horizon in both Hemispheres; and by consequence (either way) makes day and night alike long every where, in the whole world. This season remains all the time the Lamp of Heaven is passing through these 3 signs, viz. *Libra*, *Capricorn*, *Sagittarius*, the Ballance, Scorpion, and Archer.

A Prognostication,

Each thing now is fading, and therefore this is properly
termed the full, being so directly opposite to the Spring.
Hear the Poet.

*The Earth by degrees her lovely beauty bates,
Pomona loads her lap with delicacies,
Her Apron and her Paper Basket (both)
with dainty fruits for her dear Autumn's tooth,
(Her beat-blest spouse) who barefoot tops about
To tread the juice of Bacchus clusters out.*

Of Winter.

*Solstitium Hyemale, or the Winter Quarter, initiateth
December the 11th. near 7. a clock at night, at which
moment the Glorious Lamp of Heaven enters the Cele-
stial Goat, or rather the Earth Cancer; which being
farthest reflected from the Suns perpendicular race, re-
ceiveth least portion of Sunshine, and greatest quantity
of shadow, and so causeth shortest days and longest
nights to us, in these Northern parts of the world. This
season remaineth all the time the Sun is transiting Ca-
pricorn, Aquarius, and Pisces; It is assimilated to old
age, for that every thing is perfectly at the lowest Ebb
that can be.*

*Child shivering Winter dresses
with ycessicles her (self bald) borrowed tresses:
About her Brows aperiwig of Snow,
Her white freeze Mantle fringed with Ice below,
A pair of Lamb-lin'd Buskins on her feet,
So doth she march Orithia's love to meet;
who with his Bristled boary beugle Beard,
Coming to kiss her makes her Lins afraid;
whereat he sighs a breath so cold and keen,
That all the waters Christalized been;
while in a fury with his boystrous wings,
Against the Scythian Snowie Rocks he flings.
All sucks in sloth; and till these Month do end,
Bacchus and Vulcan must us both befriend.*

Trig, 1659.

Of Eclipses this Year, 1659.

In this year 1659. there will be 4. Eclipses to be seen by the inhabitants of the earth, viz, two of the Sun, and two of the Moon.

The first of which will be a visible Lunar Eclipse, on April the 26. in the evening.

	hou.	min.	sec.
The beginning at	6	34	7
True opposition at	7	54	50
The middle at	8	0	4
The end thereof at	9	26	1

Those people that lie under the Longitude of 84. h. 19. sc. shall see the middle of this eclipse in their Meridian; and such are they that live in *Jerusalem*, *Parthia*, *Syria*, and in the Islands of *Ios*, *Romeros*, *Madagascar*, and all such places that are situate in the *Indian Ocean*, it happens in *Virgo*.

The second, is an invisible solar eclipse, hapning upon the tenth day of *May*, in the very first scruple of *Gemini*. and will be seen in *Brasil*, and *Touvo*. *Pinn*. *Vaults*, *St. Michael* *Perabuco*, and in the neighbouring places of *South Brasil* &c.

The third, is a visible eclipse of the Moon, on *Octob.* the 10th. being Thursday; it happens in *Taurus*, the Ascendent of *Ireland*, *Russia*, *Polonia*; and part of *Sweden*, &c. sec. card. seg. 5. Aph. 139.

	hou.	min.	sec.
The beginning is at	13	40	3
True opposition is at	15	0	41
Greatest obscuration at	15	7	44
The end thereof is at	16	35	25

This eclipse may be observed in the Meridian of those people, who are remov'd from *London* towards the West, 3 h. 8. m. under the Longitude of 337. hou. 24. min. viz; *South Brasil*, *Mars del Nort*, *Estotland*, *New France*, &c.

C 4

According

A Prognostication,

According to the Cantons of *Astrology*, this Eclipse points out much mischief to *Ireland*, and its fellows beforementioned, but I pass to, —

The fourth Eclipse is of the Sun, on November the 4th, in the afternoon, and it is celebrated in the 22. of the pestilent sign *Σκôrπiο*, *Scorpio*. This will be visible to all *England*, I may say all *Europe*, and therefore cannot want corresponding effects (which without doubt) relates either more or less to all places where it is conspicuous :

	hou.	min.	sec.
Its beginning is at	1	51	48
The visible Conjunction	3	2	51
Middle of the eclipse	3	4	30
The end thereof	4	13	7

And thus much shall serve for the Eclipse and quarterly ingresses this Year, 1659.

FAIRES.

An Advertisement.

THe Reader is desired to take notice that there is lately published a Book Entituled, *την θιαλογια*, or, *the Doctrine of Nativities*, explaining the whole Art of Divinations and Revelations; Together, with Tables for Calculating of the Planets places, for any time past, present, or to come; With the Doctrine of Horary Questions, by way of Appendix annexed thereto. By *John Gadbury*, and is to be sold by *William Larner*, *Giles Calvert*, and *Daniel White*, at their Shops on *Ludgate-hill*, at the west end of *St. Pauls*, and in *St. Pauls Churchyard*,

FINIS.
